- Low cost, mass-produced

	BP-12
Width	8"
Depth	4"
Max. Height	12"
Box Quantity	5
Box Weight	31 lbs

*Material: powder-coated cold-rolled steel*

## A seamless beam pocket.

The BP-12 Beam Pocket is formed from a single sheet of steel into a smooth, seamless shape that slips effortlessly out of the concrete. A thin, continuous flange with 6 nail holes simplifies placement and leaves a professional-looking impression in your wall. The bottom flange includes a special locating notch (see diagram below), to make accurate setting of the pocket even easier.

Pockets nest for compact storage

Try the Steel Dog Beam Pocket and put an end to prying, hammering, and denting. Save money. Save time. Save frustration.

No more stuck pockets!
