

# Lightbulb Coil Loop

One-Sided Forming Hardware

**LB** Lightbulb Coil Loop

MADE IN USA

## Universal Coil Loop

The Steel Dog Lightbulb Coil Loop is designed as a universal means of attaching to rebar and steel studs. The loop features a bulb shape which is large enough to accept up to a #9 rebar, or easily slip over a the head of a Nelson Stud.

### FEATURES:

- Standard 1/2" coil thread to connect to any forming system
- Large coil loop
- Available in stainless steel, electroplated zinc, or hot dipped galvanize

**MATERIAL:** Carbon steel

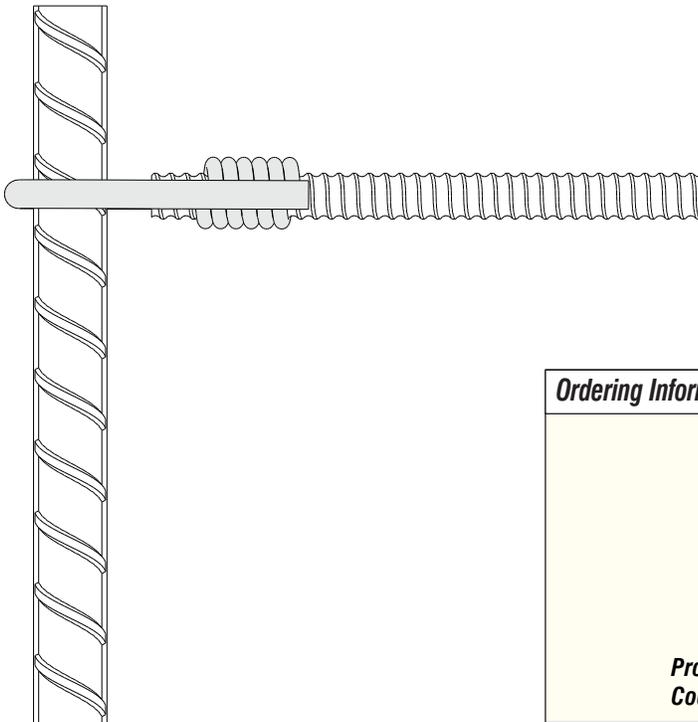

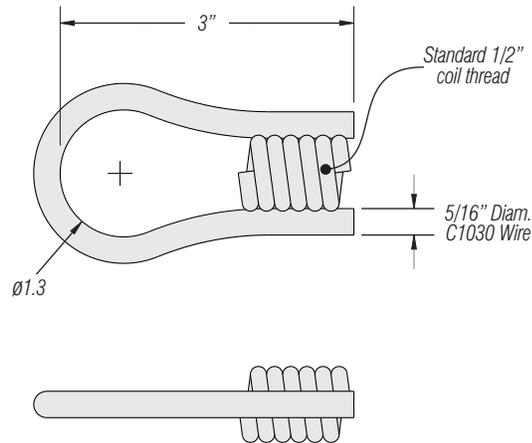

**MAXIMUM SAFE WORKING LOAD:** 4500lbs safe working load

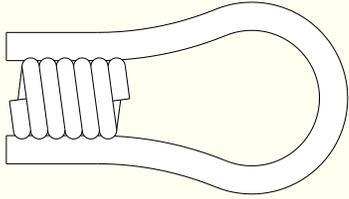

### APPLICATIONS:

- Perpendicular attachment to rebar
- Perpendicular attachment to Nelson Studs
- One-sided or blind-sided walls

### INSTALLATION:

- Slip the coil loop around the object you'd like to attach to, thread 1/2" coil rod completely into coil (min. 1/2" beyond the back of coil). Attach the other end of coil rod to formwork.
